As mentioned recently, the Hongkong Go veryment have at last determined to supply one of the greatest wants of the Colony, an efficient Detective Service. The necessity of retablishing this branch of the Police Force has been so often noticed in these columns, that it is needless to repeat the well known arguments with regard to it The wonder is that so obvious a want remained so long unsupplied : especially as the defects of the Police Service were the subject of constant animadversion both officially and n the newspapers. The secrets of Sir Richand MacDonnell's aversion to setting on foot a Detective Service seems most probably to have laid in the fact that he reposed too much confidence in the arrangements for discovering crime by means of the untive district watchmen, the licensees of the gambling houses, and, as has come to light in connection with some cases of importance, in the informers connected with Mr. D. R CALD-WELL. The arrangements probably appeared to him as satisfactory as any that could be made, and no doubt for a time they appeared to work in a manner such as would justify. confidence placed in them. But by degrees and Lee Yik, the lesses instructed by Mr. the plain truth come out that we were almost powerless in regard to all, matters as to go verning the Chinese; and that it was impossible for the police to discover the perpe trators of the most atrocious crimes, such for example, as the Holworthy and Sowkewan murders. Under such circumstances. the conclusion to be arrived at was obvious. It became clear to outside people, though the fact was persistently denied by the anthorites, that we were relying upon broken reeds, and a little reflection was sufficient to t is point. The question as to whether if so show how this happened. We were, and are to the present day, dependent entirely upon the Chinese. The district watchmen, though accountable to the REGISTRAR-GENERAL are completely free from actual control of Euro-

visited only by two inspectors a special stipulation being made in their agreement to that effect—can take their choice as to whether they will give evidence as to the whereabouts of criminals or not; the runners belonging to Mr. D. R. Caldwell, avowedly more in Chinese than in foreign interests, are likely give information with regard to criminals only when it suits the natives to do so. Thus, the end of attempts in three dis- clients, amongst whom the departmental super tinct directions at obtaining the required vision appeared in evidence to have been econoknowledge as to what is going on in the Colony is precisely the same: We have to XXII section of the Ordinance, had not existed rely upon the Chinese. This was admitted and did not exist; the whole question turned in so many words by Mr. CREAGH, Acting Superintendent of Police, in his last report, who, however, argued very illogically that, notwithstanding this fact, a detective service was not desirable. It was shown incidents the Hongkong Hotel was granted to Me ally in the Registrar-General's Report, where it was stated that the district watchmen excused themselves for not bringing forward more cases on the plea that crime was diminishing, when everything showed beld responsible that good order was at all only too distinctly that it was on the increase. Finally, with respect to Mr. D. R. CALD. well a runners, no proof is wanted, as these animadiented upon the peculiar character, of and as above noticed, are employed for the benefit of the Chinese, and are, therefore, likely to direct their attention only to the detection of such crimes as the native community desire to bring to the surface.

Thus, by degrees, a scheme apparently of a shrewd nature was found to be as defective proved it to be in practice, and in various direction's prominent attention was directed to the urgent necessity of establishing a that this license was obtained for the express Detective Service. That such a step met with any opposition at all—that it was not, in fact, the first care of those in authority that there should be a bong fide owner, and must be a subject of wonder on the part of those was are not aware of the kind of as The Ordinance was passed for the purpose of sistance upon which the Government of Hongkong has latterly been relying. It has taken some time to make this clear; but a variety of circumstances combined with certain very striking admissions in the officia-Reports themselves, have at least made it appurent that a great deal more confidence than is desirable or safe, has been reposed, for discovery of crime, in arrangements all ull timately dependent upon the Chinese.

This, or something like it, is no doubt the explanation of the otherwise unaccountable apathy of the Executive with regard to the matter; and it is it/subject of sincera congretulation that His Excellency the Light. Governor does not appear willing to allow the accumulation of facts, which shows that the Police Force is working in the dark to be longer ignored. It is sincerely to be hoped that the steps, which we are informed requisite proof had not been offered. Case disare being taken, will prove successful. Hongkong, 17th September, 1870. TO THE EDITOR OF THE "DAILY PRESS." SIE, - There is one little point in 'O'e" com munication on the relative advantages of war and peace to which I take particular exception. He seems to be under the peculiar impression that the numbers of those who die in war are not greatly out of proportion to the numbers of those who die unheard of in time of peace. He advances to support this proposition the theory that war stimulates some classes of industry and thus prevents the starvation of those wh would in the ordinary routine starva in time of pence. That at least I take to be his argument. Now I do not assail that position, but I say it utterly fails to support the theory. While war undoubtedly stimulates certain classes of industry, it also has the opposite effect on others. I take it that those who starve in time

of war are not fewer than those who starve, in time of peace. If that be so, then the numbers. killed on the field must turn the scale of mor tality overwhelmingly against war. The rest of "C's argument would apply wit equal force to a petty squabble between York-shire and Lancashire, provided enough capril de corps could be infused into such a contest. Your obedient servant.

time they started the company; and yet, with a perfect knowledge of that, they took premiums from those who were foolish enough to embark their money in the concern. When the com pany failed there was not a solitary furthing for any of the policy holders, and the whole concern was a wreck. They issued a small prospectus in which they stated the capital of the company to be \$250,000, of which £73,790 had that the derendant were prought face to face with justice he should like to know if any one of their counsel would say a capital of £73,000 odd was ever subscribed or £26,000 paid up. With such a prospectus as that in circulation was it possible for any one of the public to protect himself? On the Stock-Exchange there was a wholesome rule that before the expended upon war is so much of the nation's at the critical moment suddenly turns and rang said there had seldom been a time when there nize a company they had to be assured that resources thrown away, as it is productive of under the horse's feet; as a pilot, who finds were so many men of those forces in this countries of the capital of the company had with low balometer, from lat, 10 N., had E. and no return; whereas in time of peace, the same the vessel among rocks forgets his ounning, try as there are at present. LET US REASON TOGETHER!

Nature never intended that we should pass, as many do, nearly one half of our lives in bodily pain. Thus it becomes evident that you have, in some way, broken Nature's laws. Your Sickbeadache, Liver Complaint, Pain in the Side, and up under the Shoulder-blades-your Indiburn-your Costiveness, Piles, Sickness at the Stomach-the Pimples, Roughness, and and many other troubles and feelings of illness. are simply evidences of the fact that you have broken the laws on which Nature bases the bodily ease, comfort, health and strength of the THE Undersigned baying been appointed human family; and the chances are as a hundred to one, that unless your system gets prompt aid, your trouble will go on increasing and gradually getting worse, until it is beyoud human help. The point of great importance, then, is to obtain the proper remedy-something that will cure safely, and not by violent bealth it is intended to restore. There is such a medicine perfectly safe for the weakest and most delicate, yet powerful enough for the strongest-searching out every atom of disensed or deprayed matter, and expelling or neutralithe stomach, vigor to the liver, and regularity
